

Additional work:

Well done for being incredibly productive and completing all of the work set. I have some additional tasks for you to complete:

Maths:

<https://nrich.maths.org/9032>

<https://nrich.maths.org/9074>

Check out the links above; nrich maths is a great resource for maths games and activities. Furthermore, it goes above and beyond KS2 level. If you feel your child is ready, why not challenge them with data handling and understanding how to create a hypothesis.

Maths:

<https://nrich.maths.org/12634>

This link will send you to a page which will test your ability to work systematically, visualise, reason and convince. Once again, explore some of the activities provided and see how you get on.

Opportunities for writing:

I want to leave this task as open as possible for you. I believe writing from passion and writing from the heart always equates to better outcomes! Pick something you are passionate about:

- Earth and Space
- Animals
- The Environment
- Sport

Or anything you choose! Write a non-fictional piece about this topic, I would like it to be in a non-chronological report style; similar to our writing about the circulatory system.

<https://www.theschoolrun.com/what-is-a-non-chronological-report>

<https://www.bbc.co.uk/teach/class-clips-video/english-ks1-ks2-how-to-write-a-non-chronological-report/zvbtscw>

The links above will direct you to a website which can give you more information about writing a report.
