

Geography curriculum

Geography is a key skill for life and our curriculum is design to build the knowledge and skills children need to know about their local area, their country and the wider world. We aim to widen children's horizon to other parts of the country and world that they may not otherwise be aware of. Key skills of map reading, and compass skills are built upon throughout the school.

Geography programme of study

EYFS			
Subject	Subject	Subject	Subject
ELG – The natural world	- Children know that people live in different types of homes	 Compare and contrast locations, homes, environments and weather saying what is the same and what is different 	Countryside, village, town, city, desert, forest, jungle, ice, mountains, sea,
	 Children know that people live in different types of locations (e.g. Town, city, countryside etc.) Children know that there are different types of environment within our country and the world (e.g. Mountains, deserts, jungles etc.) 	 Record their observations through a variety of methods Be able to represent their immediate environment (School, home etc.) on a simple map or image 	islands, weather, country, United Kingdom, Devon, comparative language
	 Children know that there are different types of weather AND that certain parts of the world have more/less of these types of weather Children know that places can be represented by images and maps 		

Children can name the five oceans
Children know places and objects can be represented by
images on a map
Children know North, South, East and West
Children know that different places in the world are
different to our own
Children know vegetation is different in other parts of the
world
Children know that the type of home/vegetation/farming
that happens is a direct result of the weather of an area
Children develop knowledge about the non-European area
studied
Children know the difference between human and
physical geography

Lower Key Stage 2			
Subject	Knowledge	Skills	Vocabulary
Mountains,	Children know what the earth is made of	Children investigate and demonstrate	Magma
volcanoes and earthquakes	Children understand how mountains and volcanoes are formed	physical occurrences in the Earth	Tectonic plate Plate margin
	Children understand what is happening when an earthquake occurs and a	Children explore and think critically about	Mountain range
Migration	volcano erupts	global human geographical issues	Volcano
Rivers	Children understand what is meant by the term migrant/migration/economic migration/refugee	Children investigate the impact of physical geographical features on human	Earthquake Tsunami Migration
Villages, towns and cities	Children understand the impact of migration Children understand the impact of climate change on migration	geography	Migrant Source/host country
Water, weather	Children know where the worlds major rivers are	Children think critically about the impact of the use of natural resources on the	Push/pull factor Refugee
and climate	Children understand how rivers shape the land	environment.	Asylum seeker Persecution

Natural resources	Children understand how rivers impact human geography	River
in Northern Chile	Children understand the impact of flooding	Erosion
	· · · · · · · · · · · · · · · · · · ·	Landscape
	Children understand population distribution	Tributary
	Children understand what impacts population distribution	Deposition
	Children understand how villages, towns and cities develop	Sediment
		Transportation
	Children understand the water cycle	Riverbed
	Children understand the reasons behind seasonal changes	Population
	Children understand distribution of natural resources globally and in the	Distribution
		Density
	UK and Chile	Settlement
	Children understand circular economy driven by natural resources	Climate
		Atmosphere
		Evaporation
		Transpiration
		Condensation
		Precipitation
		Runoff
		Consumable
		Exhaustible
		Renewable
		Fossil fuels
		Abundance/scarcity
		extraction

Upper Key Stage 2			
Subject	Knowledge	Skills	Vocabulary
Local fieldwork	Children understand the value of fieldwork and how it is	Children use a range of fieldwork skills to collect and analyse data	Fieldwork, primary/secondary data,
Biomes	conducted	,	quantitative/qualitive
		Children explore and discuss critically different types	data, analysis, conclusion,
Populations		of biomes and the impact of humans upon them.	evaluation, accuracy,

	Children understand different types of biomes and where they	Children explore and discuss critically issues arising	reliability, bias,
Globalisation	are in the world.	from human geography	correlation, biome,
			ecosystem, climate,
Sustainability	Children understand the impact of humans on different		dormant, equator, fauna,
	biomes.		flora, latitude, temperate,
	Children understand population distribution		tropics, birth/death rate,
			mortality rate, life
	Children understand population pyramids and the issues of		expectancy, rural/urban
	varying population ages.		areas, sparsely/densely
	Children understand the impact of global trade on physical and		populated, globalisation,
			imports, exports, trade, unsustainable/sustainable,
	human geography		unsustamable/sustamable,
	Children understand the implications of producing electrical		
	energy		

Geography progression

		Year 1/2	Year 3/4 Year 5/6
		Pupils should be taught to:	Pupils should be taught to:
	Location knowledge	 name and locate the world's seven continents and five oceans name, locate and identify characteristics of the four countries and capital cities of the United Kingdom and its surrounding seas 	• locate the world's countries, using maps to focus on Europe (including the location of Russia) and North and South America, concentrating on their environmental regions, key physical and human characteristics, countries, and major cities
			• name and locate counties and cities of the United Kingdom, geographical regions and their identifying human and physical characteristics, key topographical features (including hills, mountains, coasts and rivers), and land-use patterns; and understand how some of these aspects have changed over time
	Location		• identify the position and significance of latitude, longitude, Equator, Northern Hemisphere, Southern Hemisphere, the Tropics of Cancer and Capricorn, Arctic and Antarctic Circle, the Prime/ Greenwich Meridian and time zones (including day and night)
		Pupils should be taught to:	Pupils should be taught to:
Geography	Place	 understand geographical similarities and differences through studying the human and physical geography of a small area of the UK, and a contrasting non-European country 	understand geographical similarities and differences through the study of human and physical geography
		Pupils should be taught to:	Pupils should be taught to:
Geography	Human and physical geography	 identify seasonal and daily weather patterns in the United Kingdom and the location of hot and cold areas of the world in relation to the Equator and the North and South Poles use basic geographical vocabulary to refer to: ② key physical features, including: beach, cliff, coast, forest, hill, mountain, sea, ocean, river, soil, valley, vegetation, season and weather ② key human features, inc. city, town, village, factory, farm, house, office, port, harbour, shop 	 describe and understand key aspects of: physical geography, including: climate zones, biomes and vegetation belts, rivers, mountains, volcanoes and earthquakes, and the water cycle human geography, including: types of settlement and land use, economic activity including trade links, and the distribution of natural resources including energy, food, minerals and water

Geography skills and fieldwork

Geography

Pupils should be taught to:

- use world maps, atlases and globes to identify the United Kingdom and its countries, as well as the countries, continents and oceans studied at this key stage
- use simple compass directions (North, South, East and West) and locational and directional language [for example, near and far; left and right], to describe the location of features and routes on a map
- use aerial photographs and plan perspectives to recognise landmarks and basic human and physical features; devise a simple map; and use and construct basic symbols in a key
- use simple fieldwork and observational skills to study the geography of their school and its grounds and the key human and physical features of its surrounding environment

Pupils should be taught to:

- use maps, atlases, globes and digital/computer mapping to locate countries and describe features studied
- use the eight points of a compass, four and six-figure grid references, symbols and key (including the use of Ordnance Survey maps) to build their knowledge of the United Kingdom and the wider world
- use fieldwork to observe, measure, record and present the human and physical features in the local area using a range of methods, including sketch maps, plans and graphs, and digital technologies

Follow a route on a

Follow a route on a

Use a simple picture

Follow a route on a

Follow a short route

Compare maps with

	Use standard symbols, and understand the importance of a key	Draw a sketch map from a high viewpoint
